

## Monitor Stand Instructions

First mount the VESA plate to your TV/Monitor with the bolts provided. One of the patterns provided should fit your Monitor.

Then Assemble the “Feet” of the stand with the long end away from the Knobs on the main Yoke, this keeps it balanced.

Then insert the VESA plate with the TV/Monitor attached into the main Yoke.

Use the supplied plate to mount your PC If needed. It lets you move the stand and PC together as a unit.
